Year Ended December 31, 2017

1. Organization and Nature of Business:

Accrued Equities, Inc. (The Company) is a Broker-Dealer registered with the Securities and Exchange Commission and a member of the Financial Industry Regulatory Authority (FINRA). The Company is an Investment Advisor for a mutual fund.

The Company is a New York Corporation and has 200 shares of no-par value common stock issued and outstanding. There is no stated value. The U.S. dollar (\$) is the functional currency of the Company.

2. Significant Account Policies:

Investment Advisory Income:

Investment advisory fees are received from a mutual fund for which the Company provides advisory services. Fees are received monthly.

Distribution and Underwriters Income:

The Company receives commission income from a mutual fund for sub-distribution services to the Fund. Fees are received semi-monthly. Co-underwriting fees are earned via offset for certain expenses of the advisor.

The Company is an accrual basis regular corporation. The Company records deferred taxes payable based on the unrealized gains or losses in marketable securities in accordance with FASB Accounting Standards Codification ("ASC") 740, Income Taxes.

Depreciation:

Fixed assets are carried at cost less accumulated depreciation. Depreciation is computed using various methods, based upon the estimated useful life and salvage value of the asset. The policy of the Company is to capitalize fixed asset acquisitions of \$5,000 or greater. An extended warranty on a fixed asset is included in fixed assets and is amortized straight line over the life of the warranty.

Statement of Cash Flows:

For purposes of the Statement of Cash Flows, the Company has defined cash as cash in bank(s).

Use of estimates:

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Fair Value Measurement:

FASB Accounting Standards Codification ("ASC") 820 defines fair value, establishes a framework for measuring fair value, and establishes a fair value hierarchy which prioritizes the inputs to valuation techniques. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market. Valuation techniques that are consistent with the market, income or cost approach as specified by FASB ASC 820 are used to measure fair value.

The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three broad levels:

- Level 1 Quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company can access at the measurement date.
- Level 2 Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3 Unobservable inputs for the asset or liability.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, for example, the type of security, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3.

The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Cash and cash equivalents -

The carrying amounts reported on the Statement of Financial Condition for cash and cash equivalents approximate those assets' fair values.

Equity securities -

The fair value of the Company's securities is determined by the quoted market price in active markets.

No events have occurred subsequent to the Statement of Financial Condition date through February 28, 2018, that would require adjustment or disclosure in the financial statements.
